AMENDMENT UNDER 37 C.F.R. § 1.111 Attorney Docket No.: Q85589

Application No.: 10/520,125

AMENDMENTS TO THE SPECIFICATION

Please delete the present Abstract of the Disclosure.

Please add the following new Abstract of the Disclosure:

The present invention provides a non-aqueous electrolyte secondary battery having high

energy density and satisfactory cycle performance by using an alloy comprising Ni and Sn as a

negative active material. The non-aqueous electrolyte secondary battery comprises a negative

electrode with a composite layer containing a negative active material, a positive electrode and a

non-aqueous electrolyte. The negative active material consists of an alloy containing 5 to 25

mass% of nickel and 75 to 95 mass% of tin and the alloy contains Sn<sub>4</sub>Ni<sub>3</sub> phase and Sn phase. It

is preferable that the content ratio of  $Sn_4Ni_3$  phase and Sn phase in the alloy be  $0.2 \le Z \le 3$ , when

 $m_1$  is the mass of  $Sn_4Ni_3$  phase,  $m_2$  is the mass of said Sn phase, and  $Z = m_1 / m_2$ ; and that the

composite layer contain carbon material.
